Summary

I am a self-taught web developer with several years commercial experience. I specialize in Ruby on Rails development with MySQL databases. I markup pages with semantic XHTML and style them with CSS adhering to W3C specification when possible. This is often combined with javascript to create dynamic and engaging user interactions. I have solid PHP skills backed by three years of professional experience. I have built out several high profile sites using Drupal and have contributed the User Relationships module back to the Drupal community. I am an efficient and self-motivated learner.

Skill Set

Software

SVN
Git
TextMate
Adobe CS 2/3
Microsoft Office

Programming

XHTML
CSS
Javascript
Ruby
Ruby on Rails
PHP 4/5 (Object Oriented)
MySQL

Operating Systems

Mac OS X
MS Win 9x - Vista
Linux
FreeBSD

Experience

Hot House

Web Developer

November 2006 - Present

Hot House is a gay pornography company and this site contains graphic images. I built the content management system and front-end in Ruby on Rails. I continue to maintain the software as necessary.

The New School of Erotic Touch

Web Developer / SysAdmin

December 2005 - March 2008

I am their only technologist. I built their servers from the ground up. This required custom compiling many packages (postfix, imap, sasl, mysql, apache). I also built the site in Ruby on Rails.

OurChart Inc.

Web Developer

August 2007 - September 2007

Wrote the User Relationships Drupal module. They were good enough to let me release it back to the Drupal community.

Vintage 59

Web Developer

November 2006 - December 2006

Create the full site from the designer's Photoshop mockups using XHTML, CSS, and PHP.

The Bonnie J. Addario Lung Cancer Foundation

Web Developer

November 2006 - December 2006

Created a WordPress theme for them. Built an application in Ruby on Rails that accepts recurring donations.
